

Automotive Service Technician

Jump start your automotive career with this 30-week Automotive Service Technician program. As an Automotive Service Technician, you will be an essential component in maintaining the health of motor vehicles. This includes investigating, diagnosing, and repairing issues related to the mechanical systems in vehicles, often undertaking complex computer diagnostics to resolve issues.

This foundation program will provide entry level practical skills and academic knowledge to prepare you to begin your apprenticeship pathway as an Automotive Service Technician. You do not need an employer sponsor to participate. In fact, one of the main reasons to complete a foundation program is to gain experience and familiarity with the trade, giving you a competitive advantage to finding an employer to hire you as their apprentice.
