

A woman wearing safety glasses and a black long-sleeved shirt is working in a carpenter's workshop. She is using a yellow tape measure on a wooden workbench. In the background, there are shelves with various tools and a blue workbench.

Carpenter Foundation

Do you want to develop a foundation for a satisfying and creative career as a carpenter?

Learn to create a building from the ground up. As a carpenter, you can work in the residential, commercial, light industrial or heavy construction fields, doing new construction, renovations, or maintenance. As well, you can go on to become a supervisor, building inspector, site superintendent, or more.

This foundation program will provide entry level practical skills and academic knowledge to prepare you to begin your apprenticeship pathway as a carpenter. You do not need an employer sponsor to participate. In fact, one of the main reasons to complete a foundation program is to gain experience and familiarity with the trade, giving you a competitive advantage to finding an employer to hire you as their apprentice.

Prince George,
Quesnel

Foundation

6 months or
less

August,
February
