
Medical Radiography Technology

- Prince George
- Diploma
- 2 years
- September

Are you looking for a rewarding career in the medical field with high opportunity?

Enroll in the CNC Medical Radiography Technology (MRAD) program and become a Medical Radiation Technologist in only 2 years.

Medical radiography includes imaging technologies such as x-ray, computed tomography, mammography, fluoroscopy, and interventional procedures.

Medical radiography is suited for people with a strong sense of responsibility and interest in other people's well-being. People who thrive in medical radiography are able to work well with both technology and people, including patients and other medical professionals, in sensitive, stressful situations.
