

# Natural Resources & Forest Technology

## NATURAL RESOURCES AND FOREST TECHNOLOGY (NRFT) DIPLOMA

 PRINCE GEORGE

 DIPLOMA

 2 YEARS

 SEPTEMBER

 IN-CLASS

In this nationally-accredited program, students study a core of forest technology courses enhanced by studies of wildlife and fish habitats, bird identification, indigenous plants, First Nations issues, and Earth science. The core of traditional, forest-based courses includes technical skills such as measurements, forest protection/ health, forest operations and silviculture. All of these studies build on a fundamental understanding of ecology, plant biology, soils, math, English, digital mapping, and Geographic Information Systems (GIS). As well, students will learn writing and presentation skills, including conducting research, completing data analysis, writing and presenting scientific reports.

Students may also take the opportunity to travel for a three-week field school (*past destinations have included China, Costa Rica and Ecuador*) where students compare approaches to land management with that of BC.

For up-to-date information on fees, courses, and programs visit
