

Electric Utility Fundamentals

Course Overview

\$645*

This online course introduces you to the basic concepts required to understand and explain the systems that generate, deliver, and sell electrical power.

This course provides an overview of BC Hydro's business model and covers the following topics:

- A review of math and physics
- Understanding electricity
- Power control and transformation
- A detailed look at utility activities, for example, metering
- Understanding consumer power requirements

Recommended

Completion of Math 11 or 12 and Physics 11 or 12.

Additional Information

After your tuition payment has been processed, you will be sent detailed instructions on how to access the course online. Students are allowed 30 weeks to complete the course. There is an option for an 8 week extension for an additional fee.

Approximately one week before the course starts you will receive a confirmation email that provides additional course details.

*Tuition is subject to applicable student fees and taxes.
