

Seed to Harvest - Cannabis Botany & Plant Science

Course Overview

Learn about introductory cannabis botany and plant science, and how it applies to entry-level positions in the cannabis industry. Explore different varieties of cannabis and their unique characteristics, and learn about growth mediums as well as the stages of cannabis plant life cycles from seed to harvest.

This course will provide the foundation for entry-level positions with licensed production facilities or micro cultivators in the industry. Guest speakers will provide insight into the industry and cannabis production work in the region.

Fees

\$649

Course Requirements

Must be 19 years of age or older. Completion of CEGR 110 Cannabis Legislation & Quality Assurance is highly recommended.
