

MICRO-CREDENTIAL

Core Skills for Data Literacy

Course Overview

Do you want to give your organization an edge up? Technology is changing and organizations now can make data driven decisions rather than just best guesses. Do you have access to data but do not know how to use it to your benefit? Then this course is for you. Develop a strong foundational data storytelling skill set so that you can make the most effective decisions.

Students will leave this course having competency in:

- Asking a question and being able to isolate the correct data to answer it
- Graphically representing data in a way that is more useful
- Learning how your data can tell a story

These skills will be able to be applied in a variety of contexts including financials, employee/donor demographics, google/social media analytics, and so much more. Participants will leave with the confidence to be able to apply these skills in their own work environment.

Fees

FREE; this is a fully funded learning opportunity

Format

Online, Instructor Led; Combination of scheduled and unscheduled activities

Ready to Register?

To register for the course, you and your employer/employment service agency must fill out both forms. Applications will not be considered complete until both forms have been submitted. [Student Form](#) | [Employer/Service Agency Form](#)
