

Health & Safety for Supervisors

Course Overview

This course provides an understanding of the supervisor's role in organizational health and safety. It will explore the requirements of due diligence, the rights of workers, supervisor and worker health and safety requirements, and employee competency as defined within the current Health and Safety Regulations of British Columbia.

The course will also look at supervisor's roles in hazard identification and control, accident reporting and investigation and the importance of communicating health and safety information.

Course materials are provided.

Upon successful completion of this course participants will receive a CNC Award of Participation.

Fees

\$151
